

1 July 1982

MEMORANDUM FOR: Director of Central Intelligence  
FROM : SA/DCI/IA  
SUBJECT : Meeting with PFIAB, 8 July 1982

1. The attached material is for your meeting next Thursday with the PFIAB.

2. You asked for a draft current intelligence update. You will find a collection of talking points on current critical issues at Tab A. They, unfortunately, are not put together as a single statement. You also asked for material on Soviet oil prospects and Soviet military expenditures. That material is included. Finally, you asked Betty to hold for you information on economic intelligence, including the 1976 memorandum. That material is attached.

3. I also asked to be included material summarizing the activities of the PFIAB with various Community agencies over the last two months. You will find that information at Tabs D through F.

4. Finally, I have included for your reference your presentations from May and January so you may review the ground you have already covered with the Board.

5. I am sure there are other topics you will want to review with them, such as the soon-to-be-completed CI study and perhaps our monitoring capabilities relevant to START and INF.

6. I need to inform you that the PFIAB has indicated its desire to come out to Headquarters for a tour during its September session. Chuck Briggs is prepared to organize that, and the DDCI has some ideas on how we should handle that visit. It might be appropriate, therefore, next week for you to invite them to come out and tell them we will be prepared to accommodate them.
